Yamaha 2004 XLT800

I just had my 2001 XL800 out yesterday. Its top speed with one rider was 41. I noticed that gage showed the rpm to be about 6200. I posted my speed and power issues several days ago on the general forum and people have responded that they were getting much more speed and power from same ski. I assume that I have issues that need to be looked into.

I posted in general, but probably should of posted here. So I just bought 2 2004 yamaha xlt 1200's 45hrs on each. The first time and only time out they rode great until coming back in. I gave it a little gas to straighten out and when I let go of the throttle it stuck and the waverunner took off and the throttle trigger was lose with no tension.
