At the end of February 1917 the tsarist government of Russia collapsed in a whirlwind of demonstrations by the workers and soldiers of Petrograd. Ziva Galili tells how the moderate socialists, or Mensheviks, then attempted to prevent the conflicts between the newly formed liberal Provisional Government (the "bourgeois" camp) and the Petrograd Soviet (the "democratic" camp) from escalating into civil war--and how, in October of that same year, they finally failed. Placing narrative history in a broad social and political context, she creates an absorbing study of idealists who tried in vain to reflect as well as to contain the unfolding revolutionary process. Galili focuses on the Menshevik Revolutionary Defensists who became the leaders of the Petrograd Soviet and of the all-Russian network of soviets. She examines

Menshevik political strategy as well as the three-way interaction between Mensheviks (both in the Soviet and the Provisional Government), workers, and industrialists. She emphasizes the perceptual and interactive aspects of the analysis of revolutions: the relations between social realities, perceptions of realities, and the formulation of political strategies; the roles of rhetorics and societal conflict in shaping social identities; and the impact of political authority and state institutions on the terms of social interaction. Ziva Galili is Associate Professor of History at Rutgers University. She is coeditor and annotator of *The Making of Three Russian Revolutions: Voice from the Menshevik Past* (Cambridge). Studies of the Harriman Institute, Columbia University. Originally published in 1989. The Princeton

'Expansive and accessible, Peter Stearns' *Sexuality in World History* offers a much needed introduction to histories of sexuality from a global perspective.' – Mary Spongberg- Head of Department of Modern History, Macquarie University, USA
This book examines sexuality in the past, and explores how it

helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasises the extent to which societies, including our own, are still reacting to historical change through contemporary sexual behaviours, values, and debates. The study uses a clear chronological structure to focus on major patterns and changes in sexuality – both sexual culture and sexual behaviours – in the main periods of world history, with comparison and discussion across cultures and societies. Topics covered include: issues involved in studying the history of sexuality the sexual implications of the transition from hunting and gathering economies to agricultural economies sexuality in Classical societies the post-Classical period and the spread of the world religions

sex in an age of trade and colonies changes in sexual behaviours and sexual attitudes between 1750 and 1950 sex in contemporary world history. The book is a vital contribution to the study of world history, and is the perfect companion for all students of the history of sexuality.

The American Popular Novel After World War II

A Tale of Two Cities

Presents Dickens' classic novel of love, courage, and sacrifice set against the

cataclysmic events of the French Revolution. During the French Revolution a dissolute English lawyer goes to the guillotine to save a French aristocrat, husband of the woman he loves.

The world has seen dramatic changes since the publication of the first edition of *The Oxford Companion to Politics of the World* in 1993. In the post-Cold War world, globalization now offers wealth and opportunities on a broader scale, as well as greater international harmony, but threatens to reinforce the advantage gap

between wealthy and poor regions and intensify environmental degradation. Conflict and squalor--expressed in brutal brushfire wars, epidemics, and chronic underdevelopment--vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade, investment, and communications. Drawing on the breadth of the first edition, this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion, and new

articles on the people, concepts, and events that have shaped the world since 1993. The second edition includes biographies of Kofi Annan, Tony Blair, Bill Clinton, and Gerhard Schröder; articles on events such as the Rwandan Genocide and the war in Kosovo; and coverage of international trade developments such as NAFTA and the World Trade Organization. Eighty-seven of the 672 articles in the Second Edition are completely new; most others are thoroughly revised. This edition also features a

substantial new set of articles, a dozen essays on critical issues written by influential figures. Recognizing the importance of including varying viewpoints, the editors have commissioned these essays to provide an informed and often passionate debate on controversial topics. Discussions include Lani Guinier and Glenn Loury on Affirmative Action; Francis Fukuyama and Milton Fisk on the Limits of Liberal Democracy; and Lloyd Axworthy and John Bolton on the United Nations. The contributors discuss nearly

every nation in the world, including extensive information on institutions, political parties, leaders, and the sources of political mobilization and conflict. The volume also includes biographies of more than seventy-five political leaders and thinkers who have shaped the contemporary political world. Articles include detailed discussions of critical historical developments and events, concepts, international law, and organizations. The Oxford Companion to Politics of the World, Second Edition is

Public libraries are keystone public institutions for any thriving community, and as such can be leaders in making cities better places to work, play, and live. Here, Dudley shows how public libraries can contribute to 'placemaking', or the creation and nurturing of vital and unique communities for their residents.

Sexuality in World History

In this lavishly illustrated, meticulously researched book, Richard White analyzes the city's planning and how it contributed to Toronto becoming a functional, world-class city. Focusing on the critical period from 1940 to 1980, he examines how planners sought to shape the city and the region amid a maelstrom of local and international influences and obstacles. Planning Toronto offers the first comprehensive explanation of how Toronto's postwar plans -- city, metropolitan, and regional -- came to be,

Page 23/44

who devised them, and what impact they had. As this definitive history reveals, planning matters -- though perhaps not always as expected.

"Through the perspectives of selected novels from the end of World War II to the end of the 20th century this book examines crucial issues for Americans during those decades. Roger Lane uses the statistics on violent death in Philadelphia from 1839 to 1901 to study the behavior of the living. His extensive research into murder, suicide, and accident rates in Philadelphia provides an excellent factual foundation for his theories. A computerized study of

Page 26/44

every homicide indictment during the sixty-two years covered is the source of the most detailed information. Analysis of suicide and accident statistics reveals differences in behavior patterns between the sexes, the races, young and old, professional and laborer, native and immigrant, and how these patterns changed overtime. Using both these group differences and the changing overall incidence of the three forms of death, Lane synthesizes a comprehensive

Page 27/44

theory of the influences of industrial urbanization on social behavior. He believes that the demands of the rising industrial system, as transmitted through factory, school, and bureaucracy, combined to socialize city dwellers in new ways, to raise the rate of suicide, and to lower rates of simple accident and murder. Finally, Lane suggests a relation between these developments and the violent disorder in the postindustrial city, which has lost the older mechanisms of

socialization without finding any effective new ones. Original and probing, Lane's combination of statistics and theory makes this a significant new work in social, urban, and medical history.

*In October 1973 a mass movement forced Thailand's prime minister to step down and leave the country, ending nearly forty years of dictatorship. Three years later, in a brutal reassertion of authoritarian rule, Thai state and para-state forces quashed a demonstration at Thammasat University in Bangkok. In *Revolution Interrupted*, Tyrell*

Haberkorn focuses on this period when political activism briefly opened up the possibility for meaningful social change. Tenant farmers and their student allies fomented revolution, she shows, not by picking up guns but by invoking laws—laws that the Thai state ultimately proved unwilling to enforce. In choosing the law as their tool to fight unjust tenancy practices, farmers and students departed from the tactics of their ancestors and from the insurgent methods of the Communist Party of Thailand. To first imagine and then create a more just future, they drew on their own

lived experience and the writings of Thai Marxian radicals of an earlier generation, as well as New Left, socialist, and other progressive thinkers from around the world. Yet their efforts were quickly met with harassment, intimidation, and assassinations of farmer leaders. More than thirty years later, the assassins remain unnamed. Drawing on hundreds of newspaper articles, cremation volumes, activist and state documents, and oral histories, Haberkorn reveals the ways in which the established order was undone and then reconsolidated. Examining this turbulent period through a new optic—interrupted

revolution—she shows how the still unnameable violence continues to constrict political opportunity and to silence dissent in present-day Thailand.

This report was jointly launched by the National Academy of Economic Strategy of the Chinese Academy of Social Sciences and UN-HABITAT. Using the indicator system and objective data, the competitiveness of 1,035 global cities was evaluated in detail. The report measures the

Page 37/44

development pattern of global urban competitiveness as a whole, and the gap between the relevant parties and the ideal state. It has refreshed people's past perceptions of urban rankings and confirmed that the science and technology innovation center cities and central cities of emerging economies have begun to break the inherent global cities and they have entered the ranks of the most urban competitiveness. While paying attention to the comparison of competitiveness among cities, this report further promotes the perspective to the pattern and trend change of global economic and

social development from the perspective of city. The followings are new findings: First, information technology has increasingly become the primary driving force for urban development; Second, it is the three meridians that divide the global urban population and economic differentiation; Third, the soft links between cities gradually dominate the global urban system; Fourth, the formation of new global cities is beginning.

When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service

qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul

routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the

new-airline scene. The Airline Revolution will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments. The Global Urban Competitiveness Report (2017-2018)
