piece of stem is part buried in the soil, including at least one leaf node. The cutting is... Root cuttings, in which a section of root is buried just below the soil surface, and produces new shoots. Scion cuttings are used in grafting. Leaf ...

Cutting (plant) -  
*Page 86/99*

## Wikipedia

Cut the flower stalk as soon as it's done blooming, and remove any damaged or diseased leaves, but leave the healthy foliage until fall. Cut back the leaves to 6 inches, and dispose of the foliage, rather than composting it. USDA Growing Zones: 3 to 10.

## CUT BACK (A PLANT)

- crossword answers,  
clues, definition ...

They require no  
regular pruning  
except for the  
removal of faded  
flowers. In  
subsequent years  
some training and

*Page 94/99*

perhaps thinning may be necessary. If renovation is required, plants can be cut back to 15cm (6in) from the base, after flowering. This operation will affect flowering and should not be carried out again within three years.

Clematis: pruning /

RHS Gardening  
Choose healthy  
shoots of new growth  
and cut lengths of  
roughly 10-20cm. Cut  
below a leaf joint with  
a sharp knife. Remove  
lower leaves to  
ensure a clean stem is  
submerged into  
water.
