Today is Earth Day and I can't think of a better book to be reading today than Smithsonian *Earth: The Definitive Visual Guide* from DK Canada. (This is the second edition of this title. More than one million copies of this title have been sold!) Our world is simply an amazing place.

Earth by James F. Luhr - Goodreads

All the superlatives given by other reviewers are spot on. It continues DK's line of excellent popular Visual Guides, like *Universe, Human: The Definitive Guide to Our Species and Animal* among others. I've ordered a used copy of the 2003 hardcover edition, and its simply stunning. It's hard to put down.

Earth The Definitive Visual Dk

Composed of around 4000 minerals and blanketed with vast oceans, the Earth is unique in hosting an abundance of life. Follow Earth's story as elements collided billions of years ago to form a rocky planet that began to orbit the Sun. Earth reveals the dynamic process that formed mountains, volcanoes, vast rivers, canyons, and more. It showcases features from Mount Everest to the Mariana Trench, as well as natural wonders including the Grand Canyon and Galapagos Islands.
