The FANUC M410iB/450 features a higher payload capacity (450 kg) than the other M-410iB models. This provides enough strength to hoist larger objects with a gripper, higher and faster than other models. In addition, the FANUC M-410iB/450 has a large working envelope that allows this heavy duty robot to service multiple production lines.

RobotWorx - FANUC M-410iB/450

FEATURES M-410iB series are the intelligent palletizing robots which contribute for robotalization of palletizing system. Suitable robot type can be selected according with workpieces. - FANUC Robot M-410iB/140H 140kg payload, high speed type

Intelligent Palletizing Robot - IRS Robotics

This is actually mentioned in the M410iB maintenance manual, in a very short paragraph pertaining to the replacement of the J1 reducer. That is basically why I asked about tips as that seemed to be a bit too little to go on. My paranoid self even had the robot end propped up as we unmounted the balancer from one of the client's spare units.
