Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Hesperides Press are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Canadian Cities in Transition is an unparalleled examination of the critical issues and major transformations taking place in urban Canada. Examining all facets of Canadian cities-including historical evolution, economic dynamics, environmental impacts, and urban lifestyles-this well-balancedresource is crafted to help the next generation address the urban problems they have inherited.

The "Microbiology" volume of the new revised and updated Handbook of Enology focuses on the vinification process. It describes how yeasts work and how they can be influenced to achieve better results. It continues to look at the metabolism of lactic acid bacterias and of acetic acid bacterias, and again, how can they be treated to avoid disasters in the winemaking process and how to achieve optimal results. The last chapters in the book deal with the use of sulfur-dioxide, the grape and its maturation process, harvest and pre-fermentation treatment, and the basis of red, white and speciality wine making. The result is the ultimate text and reference on the science and technology of the vinification process: understanding and dealing with yeasts and bacterias involved in the transformation from grape to wine. A must for all serious students and practitioners involved in winemaking.

A Novel of Auschwitz

Fuzzy Logic and Soft Computing

Forensic Architecture

Education in Human Values

Draft Supplemental Environmental Impact Statement

Twelve Years a Slave

This introductory book assumes minimal knowledge of the existence of integrated circuits and of the terminal behavior of electronic components such as resistors, diodes, and MOS and bipolar transistors. It presents to readers the basic information necessary for more advanced processing and design books. Focuses mainly on the basic processes used in fabrication, including lithography, oxidation, diffusion, ion implementation, and thin film deposition. Covers interconnection technology, packaging, and yield. Appropriate for readers interested in the area of fabrication of solid state devices and integrated circuits.

A new form of investigative practice that uses architecture as an optical device to investigate armed conflicts and environmental destruction. In recent years, the group Forensic Architecture began using novel research methods to undertake a series of investigations into human rights abuses. Today, the group provides crucial evidence for international courts and works with a wide range of activist groups, NGOs, Amnesty International, and the UN. Forensic Architecture has not only shed new light on human rights violations and state crimes across the globe, but has also created a new form of investigative practice that bears its name. The group uses architecture as an optical device to investigate armed conflicts and environmental destruction, as well as to cross-reference a variety of evidence sources, such as new media, remote sensing, material analysis, witness testimony, and crowd-sourcing. In Forensic Architecture, Eyal Weizman, the group's founder, provides, for the first time, an in-depthintroduction to the history, practice, assumptions, potentials, and double binds of this practice. The book includes an extensive array of images, maps, and detailed documentation that records the intricate work the group has performed. Traversing multiple scales and durations, the case studies in this volume include the analysis of the shrapnel fragments in a room struck by drones in Pakistan, the reconstruction of a contested shooting in the West Bank, the architectural recreation of a secret Syrian detention center from the memory of its survivors, a blow-by-blow account of a day-long battle in Gaza, and an investigation of environmental violence and climate change in the Guatemalan highlands and elsewhere. Weizman's Forensic Architecture,stunning and shocking in its critical narrative, powerful images,and daring investigations, presents a new form of public truth, technologically, architecturally, and aesthetically produced. The practice calls for a transformative politics in which architecture as a field of knowledge and a mode of interpretation exposes and confronts ever-new forms of state violence and secrecy.

A former Czechoslovak intelligence officer describes the structure and activities of the Soviet-controlled agency in the Prague that disseminates anti-American propaganda

Man's Place in Nature

*A long-standing market-leading text for urban geography courses with a Canadian perspective, Canadian Cities in Transition, now in its sixth edition, continues to examine the critical issues and major transformations taking place in urban Canada. Examining all facets of Canadian cities,including historical evolution, dynamics of economy, environmental impacts, urban lifestyles, cultural makeup, social structure, infrastructures, governance, planning, and appearance, the text is crafted to help the next generation address the urban problems they are inheriting and find solutionsfor them. With new chapters on digital cities and sustainable development, as well as new and expanded coverage of contemporary issues such as accessibility, gentrification, and the rise of the creative class, the new edition offers a comprehensive and current study of Canadian cities, written byCanadians for Canadians.*

*This is the first academic analysis of the role of embedded media in the 2003 Iraq War, providing a concise history of US military public affairs management since Vietnam. In late summer 2002, the Pentagon considered giving the press an inside view of the upcoming invasion of Iraq. The decision was surprising, and the innovative "embedded media program" itself received intense coverage in the media. Its critics argued that the program was simply a new and sophisticated form of propaganda. Their implicit assumption was that the Pentagon had become better at its news management and had learned to co-opt the media. This new book tests this assumption, introducing a model of organizational learning and redraws the US military's cumbersome learning curve in public affairs from Vietnam, Grenada, Panama, the Persian Gulf, Somalia, the Balkans to Afghanistan, examining whether past lessons were implemented in Iraq in 2003. Thomas Rid argues that while the US armed forces have improved their press operations, America's military is still one step behind fast-learning and media-savvy global terrorist organizations. War and Media Operations will be of great interest to students of the Iraq War, media and war, propaganda, political communications and military studies in general.*

*Efficiente water use: a multi-dimensional approach, principles of water use efficiency in cities and industri. Efficient use of irrigation water, implications for public policy, water re-use, water quality and rights considerations "The drought is real" designing a successful water conservation campaign. Quality of materials and its impact on public water supply systems and household installatins. Water for agriculture: improving the efficiency of center pivot irrigation with Lepa. Water use efficiency in irrigation districts. Protection of groundwater quality through efficient irrigation. On-farm water and energy use for irrigation in Latin America. Efficient water use in Basins and Making water potale in rural areas.*

*This book discusses a comprehensive spectrum of software engineering techniques and shows how they can be applied in practical software projects. This edition features updated chapters on critical systems, project management and software requirements.*

*Soft computing is a new, emerging discipline rooted in a group of technologies that aim to exploit the tolerance for imprecision and uncertainty in achieving solutions to complex problems. The principal components of soft computing are fuzzy logic, neurocomputing, genetic algorithms and probabilistic reasoning. This volume is a collection of up-to-date articles giving a snapshot of the current state of the field. It covers the whole expanse, from theoretical foundations to applications. The contributors are among the world leaders in the field. Contents:Fuzzy Logic and Genetic AlgorithmsLearningFuzzy and Hybrid SystemsDecision and Aggregation TechniquesFuzzy Logic in DatabasesFoundations of Fuzzy LogicApplications of Fuzzy Sets Readership: Researchers and computer scientists. keywords:*

Fiction. Women's Studies. Short Stories. Beginning with a story of an ex sex-worker drifting through a small rural town in the south, and ending with a young woman's wedding night, who learns from her new husband what it takes to kill a man, Nash writes across the complications of working class women, rendering their desires with visceral prose and psychologically dissecting the fundamental root that threads her work: craving and the conflicts within.

This catalogue accompanied the first American museum retrospective of the English artist Francis Bacon. In his essay, Senior Curator Lawrence Alloway explores the essence of Bacon's painting beyond the usual associations with the grotesque. Instead, he offers a different argument: Bacon was a realist painter of his time, closely tied into the Grand Manner and painters such as Manet, Van Gogh, Velasquez, and Titian. Bacon continued and evolved the central tradition of European figure painting at a time when abstraction was dominating the art world. Also included are an exhibition checklist, 64 color and black-and-white reproductions, and a bibliography.

Game analysis allows us to understand games better, providing insight into the player-game relationship, the construction of the game, and its sociocultural relevance. As the field of game studies grows, videogame writing is evolving from the mere evaluation of gameplay, graphics, sound, and replayability, to more reflective writing that manages to convey the complexity of a game and the way it is played in a cultural context. Introduction to Game Analysis serves as an accessible guide to analyzing games using strategies borrowed from textual analysis. Clara Fern á ndez-Vara's concise primer provides instruction on the basic building blocks of game analysis—examination of context, content and reception, and formal qualities—as well as the vocabulary necessary for talking about videogames' distinguishing characteristics. Examples are drawn from a range of games, both digital and non-digital—from Bioshock and World of Warcraft to Monopoly—and the book provides a variety of exercises and sample analyses, as well as a comprehensive ludography and glossary.

Canadian Cities in Transition

An Introduction to Modern Software Engineering

The Emergent Decade

Unknown MIR Title

With Copious Notes and Extracts

This book, first published in 2004, is an expanded and revised edition of Tom Lee's acclaimed RFIC text.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

-an excerpt

Real life problems are known to be messy, dynamic and multi-objective, and involve high levels of uncertainty and constraints. Because traditional problem-solving methods are no longer capable of handling this level of complexity, heuristic search methods have attracted increasing attention in recent years for solving such problems. Inspired by nature, biology, statistical mechanics, physics and neuroscience, heuristics techniques are used to solve many problems where traditional methods have failed. Data Mining: A Heuristic Approach will be a repository for the applications of these techniques in the area of data mining.

Data Mining: A Heuristic Approach

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

ic ETITE 20 expresses its concern towards the upgrading of research in Information Technology and Engineering It motivates to provide a worldwide platform to researchers far and widespread by exploring their innovations in the field of science and technology The mission is to promote and improve the research and development related to the topics of the conference The essential objective of the conference is to assist the researchers in discovering the global linkage for future joint efforts in their academic outlook

Stressing the fundamental structural features of contemporary spoken Russian, these eighteen audio-lingual lessons primarily employ imitation and repetition exercises. Also included are reading selections, a pronunciation guide, a Russian-English vocabulary, and an index -- all keyed to the first-year studies of a two-year speaking proficiency program.

Software Engineering

A Course in Modern Linguistics

Handbook of Enology, Volume 1

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Intended for introductory and advanced courses in software engineering. The ninth edition of Software Engineering presents a broad perspective of software engineering, focusing on the processes and techniques fundamental to the creation of reliable, software systems. Increased coverage of agile methods and software reuse, along with coverage of 'traditional' plan-driven software engineering, gives readers the most up-to-date view of the field currently available. Practical case studies, a full set of easy-to-access supplements, and extensive web resources make teaching the course easier than ever. The book is now structured into four parts: 1: Introduction to Software Engineering 2: Dependability and Security 3: Advanced Software Engineering 4: Software Engineering Management

A detailed look at the technology of wind generated power includes a comparison of various system designs, advice on assembling a wind power system, and an analysis of wind power availability in each state

'A beautiful read / a perfect primer for an explosive lesbian affair / an essential truth' Lena Dunham 'I have meditated repeatedly on what it was about Finn that had me so dismantled.' A young woman moves from the countryside to the city.Inexplicably, inexorably and immediately, she falls in love with another woman for the first time in her life.Finn is nineteen years older than her, wears men's clothes, has a cocky smirk of a smile - and a long-term girlfriend.With precision, wit and tenderness, Women charts the frenzy and the fall out of love.

*This book is organized in 2 volumes and 6 parts. Part I is Big Data Analytics, which is about new advances of analysis, statistics, coordination and data mining of big data; Part II is Information Systems Management, which is about the development of big data information system or cloud platform. Part III is Computing Methodology with Big Data, which is about the improvements of traditional computation technologies in the background of big data; Part IV is Uncertainty Decision Making, which is about the decision making methods with various uncertain information, such as fuzzy, random, rough, gray, unascertained. Part V is Intelligence Algorithm. Part VI is Data Security, which is a particularly important aspect in the modern management environment.*

*This proceedings book is divided in 2 Volumes and 8 Parts. Part I is dedicated to Decision Support System, which is about the information system that supports business or organizational decision-making activities; Part II is on Computing Methodology, which is always used to provide the most effective algorithm for numerical solutions of various modeling problems; Part III presents Information Technology, which is the application of computers to store, study, retrieve, transmit and manipulate data, or information in the context of a business or other enterprise; Part IV is dedicated to Data Analysis, which is a process of inspecting, cleansing, transforming, and modeling data with the goal of discovering useful information, suggesting conclusions, and supporting decision-making; Part V presents papers on Operational Management, which is about the plan, organization, implementation and control of the operation process; Part VI is on Project Management, which is about the initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time in the field of engineering; Part VII presents Green Supply Chain, which is about the management of the flow of goods and services based on the concept of “low-carbon”; Part VIII is focused on Industry Strategy Management, which refers to the decision-making and management art of an industry or organization in a long-term and long-term development direction, objectives, tasks and policies, as well as resource allocation.*
