

Personology From Individual To Ecosystem

Based on the reputable US text, the 2nd Southern African Edition of "Crafting & Executing Strategy" covers what every senior-level or entry-level MBA student in Southern Africa needs to know about crafting, executing and aligning business strategies, through presentation of core concepts and analytical techniques. A separate case and readings sections build on the main text by demonstrating the theory in practice. The core concepts are explained in language that Southern African students can grasp and provide relevant examples as used by small, medium and large SA companies. The most learner-centered and assessment-driven text available With its engaging writing style and comprehensive coverage of key research, Psychology: An Exploration, 2/e, awakens students' curiosity and energizes their desire to learn more. This brief version draws readers into an ongoing dialogue about psychology, allowing them to fully grasp the subject. The authors establish clear learning objectives tied to the most recent APA-recommended undergraduate learning outcomes. MyPsychLab is an integral part of the Ciccarelli / White program. Engaging activities plus assessments provide a teaching and learning system that helps students master psychological concepts more readily. With MyPsychLab, students can watch videos on research and applications, participate in virtual classic experiments, and develop critical thinking skills through writing. This title is available in a variety of formats - digital and print. Pearson offers its titles on the devices students love through Pearson's MyLab products, CourseSmart, Amazon, and more.

A revision of the leading textbook on personality disorders by renowned expert Theodore Millon "Personalities are like impressionistic paintings. At a distance, each person is 'all of a piece'; up close, each is a bewildering complexity of moods, cognitions, and motives." -Theodore Millon Exploring the continuum from normal personality traits to the diagnosis and treatment of severe cases of personality disorders, Personality Disorders in Modern Life, Second Edition is unique in its coverage of both important historical figures and contemporary theorists in the field. Its content spans all the major disorders- Antisocial, Avoidant, Depressive, Compulsive, Histrionic, Narcissistic, Paranoid, Schizoid, and Borderline-as well as their many subtypes. Attention to detail and in-depth discussion of the subtleties involved in these debilitating personality disorders make this book an ideal companion to the DSM-IV(TM). Fully updated with the latest research and theory, this important text features: Discussion of the distinctive clinical features and developmental roots of personality disorders Balanced coverage of the major theoretical perspectives-biological, psychodynamic, interpersonal, cognitive, and evolutionary Individual chapters on all DSM-IV(TM) personality disorders and their several subtypes and mixtures Case studies throughout the text that bring to life the many faces of these disorders Including a new assessment section that singles out behavioral indicators considered to have positive predictive power for the disorders, this Second Edition also includes a special focus on developmental, gender, and cultural issues specific to each disorder. A comprehensive reference suitable for today's practitioners, Personality Disorders in Modern Life, Second Edition features a clear style that also makes it a valuable resource for advanced undergraduate and graduate students. The most thorough book of its kind, this Second Edition is a powerful, practical resource for all trainees and professionals in key mental health fields, such as psychology, social work, and nursing.

This book explains how the process of taxation exercises control over costs that are legally recovered so that fees and costs are reasonable. The key aspects of costs and taxation are identified. The book records and integrates the practices, rules, tariffs and judgments of court, and analyses maximum tariffs that legal practitioners may charge, which have a significant impact on both the public and the legal profession. Big Data in Practice An Introduction to Theories of Personality Beneath the Mask The Science of Living Personality-Guided Therapy Personality Psychology Encyclopedia of Tourism Management and Marketing

The best-selling author of Big Data is back, this time with a unique and in-depth insight into how specific companies use big data. Big data is on the tip of everyone's tongue. Everyone understands its power and importance, but many fail to grasp the actionable steps and resources required to utilise it effectively. This book fills the knowledge gap by showing how major companies are using big data every day, from an up-close, on-the-ground perspective. From technology, media and retail, to sport teams, government agencies and financial institutions, learn the actual strategies and processes being used to learn about customers, improve manufacturing, spur innovation, improve safety and so much more. Organised for easy dip-in navigation, each chapter follows the same structure to give you the information you need quickly. For each company profiled, learn what data was used, what problem it solved and the processes put it place to make it practical, as well as the technical details, challenges and lessons learned from each unique scenario. Learn how predictive analytics helps Amazon, Target, John Deere and Apple understand their customers Discover how big data is behind the success of Walmart, LinkedIn, Microsoft and more Learn how big data is changing medicine, law enforcement, hospitality, fashion, science and banking Develop your own big data strategy by accessing additional reading materials at the end of each chapter

Personal Project Pursuit is the first book to feature Brian Little's highly respected personal projects analysis (PPA), one of the pioneering theories in contemporary personality and motivational psychology. The book examines both the internal and external dynamics of personal goals and projects and clearly demonstrates that human flourishing is enhanced when individuals are engaged in the pursuit of personal projects. The book opens with the theory and methodologies of personal projects research. The historical perspective on the development of the two dominant research perspectives from personality and developmental psychology is explored. Section II examines the internal dynamics and competing demands of goal formulation and project inception. The third part accentuates the role that social ecologies play in shaping the nature and outcomes of personal projects. These chapters highlight the importance of interpersonal relationships, organizational contexts, and the societal and cultural expectations in affecting the pursuit of personal projects. Ideas for orchestrating the environment to enhance human flourishing are explored. Section IV demonstrates how personal projects can illuminate and enhance human flourishing, from psychological well being to physical health. The book concludes with applications for enhancing human flourishing from individual counseling to public policy. Personal Project Pursuit is intended for advanced students, researchers, and practitioners in personality, social, developmental, industrial/organizational, health, environmental, clinical and counseling psychology interested in motivation and well being. An excellent supplemental text for courses on personality, motivation, positive psychology, well being, personal and life span development, the book's applied focus will appeal to counselors and rehabilitation/occupational therapists.

A definitive guide to the depth and breadth of the ecological sciences, revised and updated The revised and updated fifth edition of Ecology: From Individuals to Ecosystems – now in full colour – offers students and practitioners a review of the ecological sciences. The previous editions of this book earned the authors the prestigious 'Exceptional Life-time Achievement Award' of the British Ecological Society – the aim for the fifth edition is not only to maintain standards but indeed to enhance its coverage of Ecology. In the first edition, 34 years ago, it seemed acceptable for ecologists to hold a comfortable, objective, not to say aloof position, from which the ecological communities around us were simply material for which we sought a scientific understanding. Now, we must accept the immediacy of the many environmental problems that threaten us and the responsibility of ecologists to play their full part in addressing these problems. This fifth edition addresses this challenge, with several chapters devoted entirely to applied topics, and examples of how ecological principles have been applied to problems facing us highlighted throughout the remaining nineteen chapters. Nonetheless, the authors remain wedded to the belief that environmental action can only ever be as sound as the ecological principles on which it is based. Hence, while trying harder than ever to help improve preparedness for addressing the environmental problems of the years ahead, the book remains, in its essence, an exposition of the science of ecology. This new edition incorporates the results from more than a thousand recent studies into a fully up-to-date text. Written for students of ecology, researchers and practitioners, the fifth edition of Ecology: From Individuals to Ecosystems is an essential reference to all aspects of ecology and addresses environmental problems of the future.

The compelling story of the quest to understand the human mind -and its diseases This engaging presentation of our evolving understanding of the human mind and the meaning of mental illness asks the question that have fascinated philosophers, researchers, clinicians, and ordinary persons for millennia: What causes human behavior? What processes underlie personal functioning and psychopathology, and what methods work best to alleviate disorders of the mind? Written by Theodore Millon, a leading researcher in personality theory and psychopathology, it features dozens of illuminating profiles of famous clinicians and philosophers.

Volume 1, Models and Theories of The Wiley Encyclopedia of Personality and Individual Differences The Encyclopedia of Personality and Individual Differences (EPID) is organized into four volumes that look at the many likenesses and differences between individuals. Each of these four volumes focuses on a major content area in the study of personality psychology and individuals' differences. The first volume, Models and Theories, surveys the significant classic and contemporary viewpoints, perspectives, models, and theoretical approaches to the study of personality and individuals' differences (PID). The second volume on Measurement and Assessment examines key classic and modern methods and techniques of assessment in the study of PID. Volume III, titled Personality Processes and Individuals Differences, covers the important traditional and current dimensions, constructs, and traits in the study of PID. The final volume discusses three major categories: clinical contributions, applied research, and cross-cultural considerations, and touches on topics such as culture and identity, multicultural identities, cross-cultural examinations of trait structures and personality processes, and more. Each volume contains approximately 100 entries on personality and individual differences written by a diverse international panel of leading psychologists Covers significant classic and contemporary personality psychology models and theories, measurement and assessment techniques, personality processes and individuals differences, and research Provides a comprehensive and in-depth overview of the field of personality psychology The Encyclopedia of Personality and Individual Differences is an important resource for all psychology students and professionals engaging in the study and research of personality.

The Cambridge Dictionary of Psychology is the first and only dictionary that surveys the broad discipline of psychology from an international, cross-cultural, and interdisciplinary focus. This focus was achieved in several ways. The managing and consulting editor boards were comprised of world-renowned scholars in psychology from many different countries, not just the United States. They reviewed and edited all of the keyword entries to make them lively and applicable across cultural contexts, incorporating the latest knowledge in contemporary international psychology. Thus entries related to culture, as well as those from all domains of psychology, are written with the broadest possible audience in mind. Also, many keywords central to contemporary psychology were incorporated that are not included in many competitors, including the Oxford and APA dictionaries.

Offers a broad introduction to critical psychology and explores the socio-political contexts of post-apartheid South Africa. This title expands on the theoretical resources usually referred to in the field of critical psychology by providing substantive discussions on Black Consciousness, Post-colonialism and Africanist forms of critique.

The Science of Living (Published in 1930) looks at Individual Psychology as a science. Adler discusses the various elements of Individual Psychology and its application to everyday life. This book includes sections on the inferiority complex, the superiority complex, and other related aspects like love, marriage, sex and sexuality, and the education of children. Concrete, particular, unique human beings are the subjects of this psychology, and it can only be truly learned from the men, women and children we meet. The supreme importance of this contribution to modern psychology is due to the manner in which it reveals how all the activities of the soul are drawn together into the service of the individual, how all his faculties and strivings are related to one end. This is an important book in the history of psychoanalysis and Adlerian therapy.

A Silvan Tomkins Handbook

Personality and Everyday Functioning covers the foundations of personality theory and the impact of personality on normal functioning. Leading personality researchers present chapters on major theories of personality, such as psychoanalytic, developmental, behavioral, and constructivist, to name a few.

Social Beings: Core Motives in Social Psychology, 3rd Edition provides psychologists with a cutting-edge approach on evolutionary and cross-cultural psychology. The book addresses research on three different levels: brain function and cognition, individual and situations, and groups and cultures. The second edition has been updated to present contemporary research in social psychology. It also discusses increasingly important issues in the field including emotion science and the impact of neuroscience on social and personality psychology. The Third Edition retains the previous editions' features and adds the most up-to-date literature.

Differences between people are a fascinating and long-standing area of psychological inquiry. However, previous research has largely been confined to studies at the descriptive level. This book tries to explain individual difference, rather than merely describe them. Explanations are derived from two major competing frameworks: the biological and social approaches to individuality. The book is based on the contributions of specialists from Europe and North America invited to represent the biological and social points of view. Thus, a direct confrontation is obtained of two approaches that, hitherto, have proceeded with virtually no reference to each other. Attention is paid to behavior genetics, psychophysiology and temperament, as well as to social learning, behavioral strategies and person-environment interactions. Differences and commonalities between the biological and social approaches are scrutinized and a common framework is outlined to stimulate future research. Due to its innovative character, the book is particularly relevant for investigators in the field. In addition, it may be fruitfully used in advanced graduate level courses in personality psychology.

Digital Advertising offers a detailed and current overview of the field that draws on current research and practice by introducing key concepts, models, theories, evaluation practices, conflicts, and issues. With a balance of theory and practice, this book helps provide the tools to evaluate and understand the effects of digital advertising and promotions campaigns. New to this edition is discussion of big data analysis, privacy issues, and social media, as well as thought pieces by leading industry practitioners. This book is ideal for graduate and upper-level undergraduate students, as well as academics and practitioners.

The Cambridge Dictionary of Psychology

This book is based on the outcome of the "2012 Interdisciplinary Symposium on Complex Systems" held at the island of Kos. The book consists of 12 selected papers of the symposium starting with a comprehensive overview and classification of complexity problems, continuing by chapters about complexity, its observation, modeling and its applications to solving various problems including real-life applications. More exactly, readers will have an encounter with the structural complexity of vortex flows, the use of chaotic dynamics within evolutionary algorithms, complexity in synthetic biology, types of complexity hidden inside evolutionary dynamics and possible controlling methods, complexity of rugged landscapes, and more. All selected papers represent innovative ideas, philosophical overviews and state-of-the-art discussions on aspects of complexity. The book will be useful as instructional material for senior undergraduate and entry-level graduate students in computer science, physics, applied mathematics and engineering-type work in the area of complexity. The book will also be valuable as a resource of knowledge for practitioners who want to apply complexity to solve real-life problems in their own challenging applications. The authors and editors hope that readers will be inspired to do their own experiments and simulations, based on information reported in this book, thereby moving beyond the scope of the book.

Personality Psychology: The Basics provides a jargon-free and accessible overview of the discipline, focusing on why not all individuals think, feel, speak, or act the same way in the same situation. The book offers a brief history of the area, covering a range of perspectives on personality including psychodynamic, behaviourist, humanistic, and cognitive approaches. Also featuring fascinating case studies to richly illustrate the theories discussed, the text looks at influential theories and related research within each of the major schools of thought in personality psychology. Rigorously examining the fundamental principles of personality psychology, the author concludes by outlining the future of the area in relation to cutting edge research and potential future trends. Exploring the major personality theories that seek to explain why people behave as they do in eight reader-friendly chapters, and written in accordance with British Psychological Society (BPS) guidelines regarding content in Individual Differences, this is an essential introduction for students who are approaching personality psychology for the first time.

This text addresses the central problem in anthropological theory of the late 1990s - the paradox that humans are both products of social discipline and creators of remarkable improvisation.

Discover a wealth of issues in the field of consulting psychology with this landmark book. Explore key topics in assessment and evaluation, building teams, executive coaching, career counseling, interpersonal conflicts and relationships, benefit design, personality testing, and much more. 'Coaching is growing across the globe as a viable and useful intervention to help executives deal with the complexity they face day-to-day. In response to this increased demand, many coaches have presented their "model" of coaching to the world of business, and a number of these have made it into print. Few are based on a rigorous development process or have provided the reader with an insight into their development. The Author wanted to offer to the readers of our professional coaching series the opportunity to engage with a practitioner who had been through a journey of learning built on their experience, the literature and research. This book meets the need identified for a clear and rigorous account by an experienced coach of the development of their model within the scientist-practitioner framework. Now in its Third Edition, this book clarifies the distinctions between the vast array of personality disorders and helps clinicians make accurate diagnoses. It has been thoroughly updated to incorporate the changes in the forthcoming DSM-5. Using the classification scheme he pioneered, Dr. Millon guides clinicians through the intricate maze of personality disorders, with special attention to changes in their conceptualization over the last decade. Extensive new research is included, as well as the incorporation of over 50 new illustrative and therapeutically detailed cases. This is every mental health professional's essential volume to fully understanding personality.

This manual provides comprehensive guidelines on psychotherapy for DSM -IV Axis I (psychological) and II (personality) disorders. Each chapter examines a specific disorder (e.g. depression, anxiety, antisocial) and contains detailed instruction on using the treatment model and case examples to help illustrate techniques.

Includes established theories and cutting-edge developments. Presents the work of an international group of experts. Presents the nature, origin, implications, an future course of major unresolved issues in the area.

Lost Childhood explores the everyday lives of street children in India. It presents insights on their life on the streets to provide a comprehensive understanding of why they are driven to extreme means of livelihoods. This volume, · Inquiries into the histories of street children, and discusses their socio-economic and socio-demographic characteristics to provide a sense of their living conditions; · Sheds light on the social injustice experienced by these children, their health and hygiene, and also looks at the insecurities faced by the children in their interactions with the society; · Uses detailed field research data to highlight issues that affect the lives of street children such as education, gender discrimination, and their social networks; · Suggests a way forward that would not only benefit street children but will also be of use to the community in understanding their lives, problems, and help explore this issue in further detail. The book will be useful to scholars and researchers of human geography, development studies, child development, urban poverty, and social justice. It will also be of interest to policymakers, social workers, and field workers who work with street children.

The Encyclopedia of Tourism Management and Marketing is, quite simply, the definitive reference work in the field. This is the largest tourism management and marketing ontology that has ever been put together and offers a holistic examination of this interdisciplinary field. Bringing together a wealth of expertise, a team of international authors from all parts of the world shed light on the current state of tourism research and practice around the globe and provide unique insights into the field. Carefully curated by leading tourism scholar Dimitrios Buhalis, the Encyclopedia is an invaluable resource for academics, students and practitioners and provides the ideal starting point for any research journey. The concise entries present an accessible and condensed overview of each topic and the selected references that follow each entry suggest directions for further detailed exploration. Key Features: - Over 1000 entries - Entries organized alphabetically for ease of navigation - Fully cross-referenced - Concise, structured entries by the world's foremost scholars in tourism - Selected references for further study - Inclusive global authorship team. Contact us for a quote.

A New York Times Notable Book In these pages, acclaimed author Gish Jen portrays the day-to-day of American multiculturalism with poignancy and wit, introducing us to teenaged Mona Chang, who in 1968 moves with her newly prosperous family to Scarshill, New York. Here, the Chinese are seen as "the new Jews." What could be more natural than for Mona to take this literally—even to the point of converting? As Mona attends temple "rap" sessions and falls in love (with a nice Jewish boy who lives in a tepee), Jen introduces us to one of the most charming and sweet-spirited heroines in recent fiction, a girl who can wisecrack with perfect aplomb even when she's organizing the help in her father's pancake house. On every page, Gish Jen sets our received notions spinning with a wit as dry as a latter-day Jane Austen's.

The Person provides psychologists with an organizational scheme for personality psychology. This sets the study of the person into evolutionary and cultural context and divided personality up into three broad areas: dispositional traits, characteristic adaptations, and integrative life stories. The fifth edition has been updated to reflect advances that have occurred in the field of psychology in the past few years. It presents new findings that have been obtained with respect to the correlates of personality traits, the dynamics of motives and goals in human lives, and the meanings and manifestations of life stories. Discussions are included on the new ideas on evolution and morality as well as the role of culture in personality. Psychologists will also find a much stronger and detailed discussion of psychophysiology of extraversion, neuroticism, and the train of sensation-seeking.

A revolutionary, personalized psychotherapy approach for the treatment of Axis II personality disorders, by renowned expert Dr. Theodore Millon Acknowledging the primacy of the whole person, Overcoming Resistant Personality Disorders: A Personalized Psychotherapy Approach all of the complexities of human nature--family influences, culture, neurobiological processes, unconscious memories, and so on--illustrating that no part of human nature should lie outside the scope of a clinician's regard. Part of a three-book series, this book provides you with conceptual background and step-by-step practical advice to guide your treatment of Axis II personality disorders. Detailed case studies are provided throughout the text to illustrate the strategies of personalized psychotherapy for: * The Needy/Dependent Prototype * The Social * The Confident/Narcissistic Prototype * The Nonconforming/Antisocial Prototype * The Assertive/Sadistic Prototype * The Conscientious/Compulsive Prototype * The Skeptical/Negativistic Prototype Destined to become an essential reference for trainees and professionals, this revolutionary call to return therapy to the natural reality of each patient's life, seamlessly guiding you in understanding the personality and treatment of the whole, unique, yet complex person.

Crafting and Executing Strategy: South African Edition is an adaptation of the worldwide market-leading text by Thompson, Strickland and Gamble. The aim of the book is to effectively and interestingly cover what every senior-level or MBA student in South Africa needs to know executing and aligning business strategies. Crafting and Executing Strategy contains a wealth of South African examples and illustration capsules as well as five South African cases to accompany five international cases. The selection includes cases on black economic empowerment, clothing, luxury goods, motor cycle and retail industries. The flexible combination of text, readings and cases allows instructors to teach concepts and analytical tools while also providing a taste of the stimulating literature in strategic management. If required, instructors have access to two different McGraw-Hill Online Simulation Games with the book - either the Business Strategy Game or GLO-BUS (visit <http://www.mcgraw-hill.co.uk/sim> for more information on these simulation games).

An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins The brilliant and complex theories of psychologist Silvan Tomkins (1911–1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect developed it in his four-volume masterwork Affect Imagery Consciousness. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's contributions, from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know about the foundations of affect studies.

In this revised and expanded edition of The Redemptive Self, McAdams shows how redemptive stories promote psychological health and civic engagement among contemporary American adults.
