Presents a collection of children's literature from Europe, Asia, and the Middle East.

The World: A history interweaves two stories: the story of our interactions with nature and the story of our interactions with each other. The environment-centered story is about humans distancing themselves from the rest of nature and searching for a relationship that strikes a balance between constructive and destructive exploitation. The culture-centered story is about how human cultures have become mutually influential and yet mutually differentiating. Both stories have been going on for thousands of years. We do not know whether they will end in disaster. There is no prospect of covering all of world history in one book. Rather, the fabric of this book is woven from selected strands. Readers will see these at every turn, twisted together into yarn, stretched into stories. Human-focused historical ecology—the environmental theme—will drive readers back, again and again, to the same concepts: sustenance, shelter, disease, energy, technology, art. (The last is a vital category for historians, not only because it is part of our interface with the rest of the world, but also because it forms a record of how we of the way we see its changes.) In the global story of human interactions—the cultural theme—we return constantly to the ways people make contact with each another: migration, trade, war, imperialism, pilgrimage, gift exchange, diplomacy, travel—and to their social frameworks: the economic and political arenas, the human groups and groupings, the states and civilizations, the sexes and generations, the classes and clusters of identity.

**5-Steps, Barron's and the others are great resources for reviewing at the end of the year, but Tamm's Textbook Tools accompany kids all year long. They are filled with assignments that follow the regular book throughout the year, all 34 chapters. They can also be used as reviews. Teachers can copy vocab lists and chapter activities at will, and they are perfect if there is a substitute. When publishers started putting the majority of their content online, it opened a niche for traditional paper assignments. But it doesn't matter whether the textbook is written in ink or electrons, students still need to write and keep a notebook for themselves. Portfolios still matter. This series fills that void. Easily collectible, it may also be used as a student consumable. Save hundreds of hours of planning time. Facebook message or email (hudsonfla@gmail.com) if you want bulk pricing for a class set.**

**By the time teens are in high school, they have already spent years wrestling with a heavy backpack. It's high time to solve this problem--and Pearson can help. Explore Pearson@home social studies products for home use.**

The past is not simply a list of events. Historical records are the means by which historians develop their interpretations of those events. Because interpretations differ, there is no single historical record, but various narrations of events each told from a different perspective. Therefore the study of history is intimately linked to the study of values, the values of the historical actors, the historians who have written about them, and of the students engaged in learning about them. The World's History links chronology

to the emergence of early humans to the present day. Each Part emphasizes a single theme—for example, urbanization or religion or migration—and students learn to use them all to analyze historical events and to develop a grasp of the chronology of human development. The final chapter employs all the themes developed in the first seven Parts as tools for understanding the history of our own times. Geographically, each Part covers the entire globe, although specific topics place greater emphasis on specific regions.
