

# **Whiplash And Hidden Soft Tissue Injuries When Where And Why To Refer Auto Accident Patients**

Soft foam cervical collars were once commonly used for whiplash injuries to hold the neck and head still. However, studies have shown that keeping the neck still for long periods of time can decrease muscle strength and interfere with recovery. Recommendations for using a collar vary.

If you are experiencing minor to moderate discomfort from a whiplash injury, this is a soft tissue injury as well. Note that some injuries to soft tissues, such as herniated back disks, can cause a lot of pain. On the other hand, a serious car accident injury is a 'hard injury.'
